

# Computer-Aided Dispatch and Records Management System Addendum #2

1. Do you need the vendor to include AVL hardware in their quote?
  - No, we have GPS signal, through Ethernet port, from Sierra Wireless GX440 routers in the cars.
2. Do you already have Net Motion in place for connectivity to the mobile units?
  - Yes
3. Do you already have second factor authentication for the mobile units, or do you need the vendors to include this in the pricing?
  - The vendor should include this in the pricing.
4. Please tell us more about your expectations for the date given - October 1, 2016, and what you mean by “fully Functioning.” Is this the date that you expect the system to be live or the date that you expect the system to be installed on hardware to start building, testing, and training on the system?
  - It is our intent to have records management fully operational by this time. This would include full integration with Karpel and Beacon JMS.

## NOTICE TO ALL BIDDERS AND PLANHOLDERS

The documents for the above-referenced Project are modified as set forth in this Addendum. The original documents and any previously issued addenda remain in full force and effect, except as modified by this Addendum, which is hereby made part of the Contract Documents. ***Bidder shall take this Addendum into consideration when preparing and submitting a bid, and shall acknowledge receipt of this Addendum in the space provided on the Bid Form.***
