## 1. INTRODUCTION

### 1.1. OVERVIEW, OBJECTIVES, AND BACKGROUND

The Klamath County (the "County") Information Technology Department ("County IT") supports over 30 departments and service districts at more than 25 locations throughout the County. The County's data network is comprised of a fiber, copper and wireless network infrastructure that supports over 400 computers, servers, routers and switches. These may require rewire and retrofitted wire for expansions, newly developed sites, moves, and change requests.

County IT is responsible for ensuring that the County Government and Service Districts have the most reliable and cost effective communications and networking systems provided to them to enable daily business to business functions as well as essential public services, including 24x7 Sheriff, Jail, and Corrections programs. The County requires the expertise of a contractor who understands older wiring schemes and can provide direction for newly developed schemes utilizing current standards and best-practices for communication wiring.

1.1.1. In order to ensure consideration, proper identification and handling, the Proposal must be clearly marked:
