

## Merrill Building Remodel

All components will be co-designed with contractor and library staff

### Building remodel:

- Remove the metal lockers: The lockers will need to be removed undamaged. They will be stored by the Merrill Park Board.
- Build a lockable cabinet: design will be determined by the space left after the removal of the lockers
- Build a cabinet between the stairs and the library wall with an access door to access the storage area under the stairs. The door will need a lock. The cabinet will need a light if necessary.
- Redo the handicap ramp
