

# **Community Development Significant Changes 2015-2016**

## **Revenue Changes:**

**General fund subsidy to Planning \$77,00 down 10%**

## **Departmental Changes:**

**We are now using the State of Oregon E-permitting (Accela) software for Planning, Building, On-Site and Code Enforcement. The E-permitting software is offered to all Building jurisdictions within Oregon through the Oregon State Building Codes Division. Our Planning department has collaborated with the State to create the first “planning” model for other jurisdictions to use, after purchasing the planning module separately. The costs of the Building module is covered by 4% of a 12% state surcharge charged on building permits.**
