Brief Description of Project*

Buying a timing system for area colleges and high schools can utilize at minimal comparative cost, that will pay operators to run. Also, sending a group of 10 people to receive USATF training to track and field officials, to be paid, certified track officials.

Also provide a project schedule if possible.

Explain the source of all funds for this project*

So, far, we have raised a little over \$500 as a team, through our fundraisers. Our fundraising will continue. Also, we have a coach that is willing spend his own personal money to ensure these kids have a way to continually fund our team, and these jobs, that these grant items will help us pay for.

In addition to this answer, a project budget is necessary. A detailed budget is not required; in the box below provide a general financial description. Identify how this project would be modified if only partial funding from the County is obtained. Be sure to include the required 30% cash match in your budget

Explain what exactly the project funds (and especially the county funds) will pay for*

- 1) Lynx Timing System package 3 (\$16,500)
- 2) 3 Laser measuring devices (\$3,000 x 3/\$9,000)
- 3) Finish Line Monitor (\$4000)
- 4) USATF Officials Training for 10 people (\$2000)

If this project gets partial funding, we will move down in Timing System package. Even though it's a huge seeking point to our services and could gather less business, I'd consider leaving out the finish line monitor. Also, I could try paying for officials training out of my personal pocket and seeing how much said officials could kick - in.

Identify the specific economic development benefits from this project*

There will be 12 jobs created from this, for 8-10 months out of every year. \$75 dollars per meet, starting pay for officials (3-4 hours in average length) \$100 per championship meets.

Reference to economic development objectives in section 5 in grant memorandum

Identify how this project is consistent with regional or local economic development plans*

This idea will put 12 people to work, for as many hours as they want to work. This is consistent with any successful gainful employ.
