## Oregon reports 1,173 new confirmed and presumptive COVID-19 cases, 41 new deaths

Portland, Ore. — There are 41 new COVID-19 related deaths in Oregon, raising the state's death toll to 1,799, the Oregon Health Authority (OHA) reported at 12:01 a.m. today.

Oregon Health Authority reported 1,173 new confirmed and presumptive cases of COVID-19 as of 12:01 a.m. today, bringing the state total to 132,412.

### Vaccinations in Oregon

Today, OHA reported that 16,117 new doses of COVID-19 vaccinations were added to the state immunization registry. Of this total, 11,332 vaccine doses were administered on Jan. 15.

Based on updated totals, OHA is meeting Gov. Kate Brown's goal of ensuring 12,000 vaccinations a day. The Governor required the benchmark to be met by the end of the two-week period that began Jan. 4.

Cumulative daily totals can take several days to finalize because providers have 72 hours to report doses administered and technical challenges have caused many providers to lag in their reporting. OHA has been providing technical support to vaccination sites to improve the timeliness of their data entry into the state's ALERT Immunization Information System (IIS).

Oregon has now administered a cumulative total of 189,190 first and second doses of COVID-19 vaccines. All vaccinations were administered by Oregon hospitals, long-term care facilities, emergency medical service (EMS) agencies, urgent care facilities and Local Public Health Authorities (LPHAs).

To date, 335,075 doses of vaccine have been delivered to sites across Oregon.

These data are preliminary and subject to change. OHA's [dashboards](#) provide regularly updated vaccination data.

### COVID-19 hospitalizations

The number of hospitalized patients with COVID-19 across Oregon is 365, which is 22 fewer than yesterday. There are 92 COVID-19 patients in intensive care unit (ICU) beds, which is five fewer than yesterday.

The total number of patients in hospital beds may fluctuate between report times. The numbers do not reflect admissions per day, nor the length of hospital stay. Staffing limitations are not captured in this data and may further limit bed capacity.
