Oregon COVID-19 update January 29, 2021

8 pages

NOTE: The daily graphs usually available on weekdays were not readily available January 29.

Oregon reports 976 new confirmed and presumptive COVID-19 cases, 8 new deaths

PORTLAND, Ore. — There are eight new COVID-19 related deaths in Oregon, raising the state's death toll to 1,938, the Oregon Health Authority reported at 12:01 a.m. today.

OHA reported 976 new confirmed and presumptive cases of COVID-19 as of 12:01 a.m. today, bringing the state total to 141,729.

NOTE: Today's media briefing recording is available [here](#) and slides are available [here](#).

Vaccinations in Oregon

Today, OHA reported that 23,004 new doses of COVID-19 vaccinations were added to the state immunization registry. Of this total, 15,813 doses were administered on Jan. 28 and 7,191 were administered on previous days but were entered into the vaccine registry on Jan. 28.

Cumulative daily totals can take several days to finalize because providers have 72 hours to report doses administered and technical challenges have caused many providers to lag in their reporting. OHA has been providing technical support to vaccination sites to improve the timeliness of their data entry into the state's ALERT Immunization Information System (IIS).

Oregon has now administered a cumulative total of 382,374 first and second doses of COVID-19 vaccines. To date, 614,525 doses of vaccine have been delivered to sites across Oregon.

These data are preliminary and subject to change. OHA's [dashboards](#) provide regularly updated vaccination data, and Oregon's dashboard has been updated today.

OHA releases new COVID 19 forecast

OHA released the latest COVID-19 model today, which shows a decrease in daily cases. The new report estimates that, as of Jan. 13, our statewide reproductive rate was 0.81.

According to the newest forecast, if we continue along our present course of wearing masks, keeping physical distance and restricting our gatherings, daily COVID-19 cases will decline to an average of 420 per day and COVID-19 related hospitalizations will decrease by 13 per day.

A 30% increase in transmission would translate to roughly 720 daily cases and 24 new hospitalizations a day, as well as 240 cases per 100,000 people by mid-February.

The new modeling does not factor in the presence of the UK variant strain of COVID-19 in Oregon.

The report indicates that two-thirds of surveyed Oregonians are likely to get the COVID-19 vaccine when it becomes available and when it is their turn.

COVID-19 hospitalizations

The number of hospitalized patients with COVID-19 across Oregon is 288, which is three fewer than yesterday. There are 68 COVID-19 patients in intensive care unit (ICU) beds, which is four fewer than yesterday.

The total number of patients in hospital beds may fluctuate between report times. The numbers do not reflect admissions per day, nor the length of hospital stay. Staffing limitations are not captured in this data and may further limit bed capacity.

[More information about hospital capacity can be found here.](#)

Cases and deaths

The new confirmed and presumptive COVID-19 cases reported today are in the following counties: Baker (2), Benton (27), Clackamas (97), Clatsop (5), Columbia (10), Coos (16), Crook (5), Curry (2), Deschutes (43), Douglas (10), Harney (2), Hood River (5), Jackson (125), Jefferson (16), Josephine (20), Klamath (14), Lake (1), Lane (61), Lincoln (11), Linn (26), Malheur (10), Marion (82), Morrow (5), Multnomah (143), Polk (27), Sherman (1), Tillamook (3), Umatilla (33), Union (5), Wasco (10), Washington (135), Wheeler (2) and Yamhill (22).

We share aggregated COVID-19 related deaths on [OHA's public dashboards](#), which are updated daily. A breakdown of today's reported deaths by age category is included below.

Server maintenance

OHA has scheduled time to perform server and file migration maintenance on its data management system known as the Oregon Pandemic Emergency Response Application (OPERA). OPERA serves as the state’s database for COVID-19 cases.

OPERA will be down from 10 a.m. to 10 p.m. on Saturday, Jan. 30. The scheduled work means that OHA’s Health Information Center will not be reporting information on COVID-19 cases and deaths on Sunday. We may see an increase in the total number of cases reported on Monday as laboratory results that were reported on Saturday will not be processed until Sunday.

OHA’s daily media releases will return on Monday, Feb. 1.

People Vaccinated by Demographic Group

These tables show the number of people who have received COVID-19 vaccine in Oregon by race, ethnicity, sex and age group.

RACE†

People with two or more races are counted in each of their racial groups.

American Indian / Alaska Native	6,445
Asian	13,437
Black	4,608
Native Hawaiian / Pacific Islander	2,428
White	226,816
Other Race	86,220
Unknown	49,001

ETHNICITY†

Hispanic	14,997
Not Hispanic	222,154
Unknown	77,806

SEX

Female	201,359
Male	110,871
Unknown	2,727

AGE GROUPS

16 to 19	3,147
20 to 29	39,520
30 to 39	60,465
40 to 49	60,299
50 to 59	54,639
60 to 69	46,506
70 to 79	29,220
80+	21,161

People Vaccinated by County*

The map shows the number of people vaccinated per 10,000 by county of residence. For privacy purposes, counties with the number of vaccinated people between 1 and 5 will be shown as "Suppressed."

[Click on a county below to filter the data on the right.](#) [Click again to clear the filter.](#)

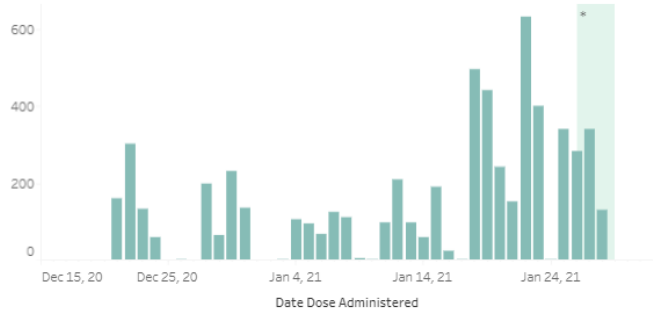

People vaccinated per 10,000: lighter colors represent counties with lower vaccination rates, while darker colors represent counties with higher vaccination rates.

People Vaccinated	KLAMATH	
2,982	1,438	4,420
Series In Progress	Fully Vaccinated	Total People

Doses Administered by Day

*Doses administered during this time may not yet be reported.

[Oregon HOSCAP Update](#)

Notes

Data are provisional and subject to change.

*Every hospital in Oregon is asked to submit data twice daily to Oregon's Hospital Capacity Web System (HOSCAP). Data are based on the most recent report from the hospitals, available as of 9:00am. Hospital staff are asked to enter bed capacity information, by type, as well as the number of patients with suspected or confirmed COVID-19 illness who are currently hospitalized at the time of data entry. These data may conflict with hospitalization status in Orpheus due to case reporting and investigation lags and temporary discrepancies in case classification.
